

GenAI...

So, where's the data?

AI has a big data problem.

Organizations face a major challenge when it comes to implementing AI at scale. AI technology must be trained on company data, yet it is unable to scale to enterprise data volumes. Today, companies struggle to find, cull, and deliver the most relevant data for AI from across the enterprise, while ensuring data is properly managed for governance, risk, and compliance.

Search, govern, and cull enterprise data for AI.

ZL Tech enables organizations to search and cull data enterprise-wide, while managing it for governance, risk and compliance.

By searching and managing data “in-place,” the platform extracts the essence of every document and message, delivering a curated data feed for AI and analytics without copying data.

Curated

Searches and filters data from across the enterprise to deliver a feed of targeted, relevant data for GenAI and analytics.

Virtual

Provides a virtual data management layer to extract content and metadata from documents without creating copies.

Governed

Delivers governance, risk, and compliance functionality to provide defensibility for AI.

Solution Benefits

Harness and explore employee-created data from across the enterprise in-place for AI, including Microsoft 365 messages and files.

Enable completely new insights into the human side of the company, illuminating every aspect of the workforce.

Deliver information governance across enterprise data, for privacy, compliance, eDiscovery, and records management.

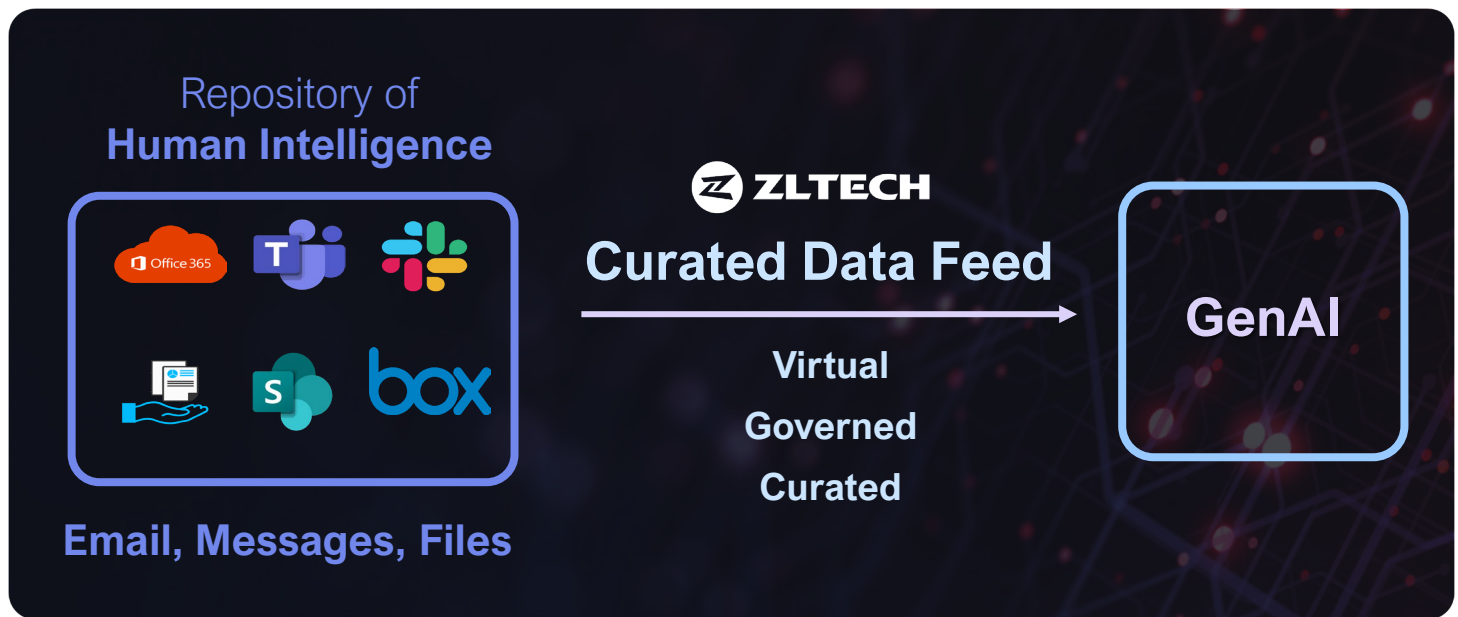

Enable 1000X time-to-data speed for GenAI and analytics.

Search across the enterprise “in-place,” without creating data copies.

From **out of sight** to **insight**.

When surfaced, information created and shared by employees every single day has the power to reveal a side of the enterprise never yet seen. ZL Tech delivers a platform for harnessing unstructured data for AI and analytics, trusted by the Fortune 500 and beyond, including 4 of the 5 top US banks.

The ZL Unified Platform empowers visibility and control over information for legal, regulatory, and privacy requirements, while maximizing its value for AI and analytics. ZL Tech is unique in its ability to unify all governance functions under a single centralized platform, while harnessing enterprise data for deep insights.

New Insights	Unified Platform	Enterprise-Wide
Explore data in near-real time and empower insights at 1000X speeds via in-place search.	Deliver all governance functions in synergy via a singular platform, enabling defensible AI.	Manage unstructured data at an enterprise scale. Most platforms operate on sandboxes—ZL manages the entire beach.
