

ZL Tech Unified Data Governance

Unified information governance for employee-created data.

EMAIL

ZL Tech enables comprehensive management and archiving of email data, including Microsoft Exchange, Gmail, and more. For regulatory compliance and improved email management, ZL Tech captures content, metadata, attachments, notes, calendar items, and folder information.

FILE SHARES

Shedding light on dark data, ZL Tech manages all files—in-place and archived. Leveraging complete control over file metadata and content, organizations can clean up bloated file shares by removing redundant, outdated, and trivial (ROT) data.

MICROSOFT 365

ZL Tech enables governance of the entire Microsoft 365 ecosystem, including Exchange Online, OneDrive, SharePoint Online, and more.

MICROSOFT SHAREPOINT

Ending SharePoint sprawl permanently, ZL Tech ingests Microsoft SharePoint content and metadata for enterprise eDiscovery, records management, compliance, and other functions.

MICROSOFT TEAMS

ZL Tech captures the critical components of every interaction that occurs within Microsoft Teams, including content such as messages, files, reactions, and the context surrounding these interactions. Thereby providing functionality for users to apply governance policies and review messages for compliance with SEC and FINRA rules.

INSTANT MESSAGE AND SMS

ZL Tech supports archiving of all Microsoft and Bloomberg IM platforms, as well as Blackberry Enterprise Server compatibility to capture and manage SMS, PIN-to-PIN logs, and call logs.

SOCIAL MEDIA

Ensuring compliance across social media platforms, such as Facebook, LinkedIn, Twitter, and more, ZL Tech enables an indelible record of activity—even if posts and settings are edited or removed over time.

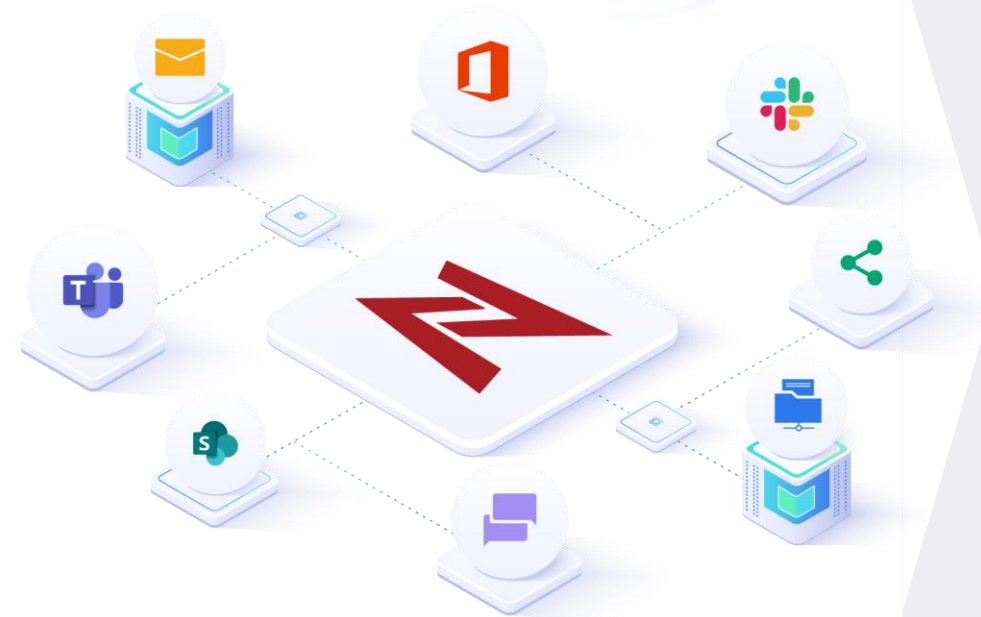

LEGACY SYSTEMS

ZL Tech provides the most comprehensive platform for archiving and migrating data from legacy systems and databases for application sunsetting.

Unifying Data Sources

No more silos, know more data.

ZL Tech delivers seamless in-place management alongside archiving, in a singular, unified platform.

Unifying Solutions

ZL Tech is unique in its ability to bring together all governance functions under a single, centralized platform—truly unifying information governance.

FILE ANALYSIS AND MANAGEMENT

Regain control of your file shares. ZL Tech gives organizations the tools they need to defensibly clean up file shares, uncover insights, and apply long-term governance policies. ZL Tech can be deployed globally for multinational organizations with file shares in multiple locations, offering both a regional and a global view of policies.

PRIVACY

Find, control, and remediate sensitive data for true privacy by design. ZL Tech enables organizations to identify personal data with pattern recognition and remediate it in compliance with privacy regulations, such as the California Consumer Protection Act (CCPA) and the EU's General Data Protection Regulation (GDPR).

COMPLIANCE

Reduce risks and stay ahead of the evolving regulatory landscape. ZL Tech delivers sophisticated compliance and supervision capabilities driven by a highly granular lexical system. Used by four of the top five banks for SEC and FINRA compliance, ZL Tech offers cutting-edge capabilities:

- Echo Reduction technology that dramatically reduces review time
- Surround Queries, which combine a string of lexical rules to precisely identify violations and minimize false positives
- A built-in analytics dashboard that provides even more insight

DISCOVERY

Arm your legal team with evidence to win or settle early. ZL Tech transforms the left-hand side of the EDRM by searching the entire enterprise—beyond pre-defined custodians—to find relevant documents from day one. Delivering unparalleled search functionality, ZL Tech centralizes the preservation of enterprise emails, file shares, and collaboration tools so that users can search across billions of documents in seconds. Built-in analytics further provide users deep, instantaneous insight into documents and cases.

RECORDS

Preserve your corporate memory. ZL Tech delivers both in-place and archiving-based records management across all data sources. From a centralized platform, users can apply classification and retention policies—including time-, event-, and metadata-based triggers. Policies are executed in synergy with eDiscovery and Compliance functions for true unified governance.

AI AND ANALYTICS

For the first time ever, organizations can tap into the “human side” of the enterprise by harnessing the massive volumes of unstructured data created every day by employees and customers. This data contains the intent, sentiment, and dynamics of the workforce, as well as the repository of all corporate knowledge.

The ZL Platform extracts the essence of every document and message, enabling organizations to search, cull and deliver a curated data feed for AI and analytics, while also managing it for governance, risk and compliance.
