ZLTECH

ZL Tech for Federal Agencies

The Future of Unstructured Data Management

Enabling governance guardrails to harness unstructured data.

ZL Tech delivers the only organization-wide solution to curate and cull unstructured data—such as electronic messages and files—to meet two critical federal agency requirements:

- ✓ **Governance, Risk & Compliance (GRC):** including DoD 5015-certified records-keeping, classified data handling, and FOIA needs.

- ✓ **AI Enablement:** Massive-scale data preparation and "scrubbing" to provide relevant, governed data for AI/ML systems.

GenAI . . . So, where's the data?

In business for 25 years, ZL Tech's software manages petabytes of unstructured data, empowering both governance and AI/LLM initiatives for the Global 1000 and federal agencies.

- ✓ Free data analytics from its "sandbox" limitations to explore the entire "beach."

- ✓ In-Place management to reduce storage costs and liability by managing data virtually, without unnecessary copies.

- ✓ "Defensible" deletion to mitigate risk with secure data deletion processes.

- ✓ Accelerated "Time-to-Data" and insights by several orders of magnitude.

- ✓ Unified Governance including Classified Records Management, Privacy, FOIA + feed to AI.

Capabilities

**DoD 5015.2 Certified:** Ensuring proper management of highly classified documents.

Trusted by NARA: Selected to establish the Capstone standard for federal records management.

Unified Data Governance: Satisfying records, compliance, privacy and legal needs under one platform.

Global Search: In-place search and data "wrangling" for eDiscovery, FOIA requests, and internal investigations.

Disposition at Scale: Leverage event-based triggers and audit trails to ensure secure, defensible deletion with full accountability.

AI Integration: Feed analytics and AI/ML models with properly governed and prepared data.

From Ingestion to Insights: Complete Data Control

ZL Tech seamlessly connects to data sources across the agency's ecosystem, providing a unified platform for comprehensive governance guardrails. Designed to meet the most stringent Governance, Risk, and Compliance (GRC) requirements, ZL Tech's highly scalable architecture ensures organizations remain compliant while minimizing risk.

Beyond governance, the platform simplifies data curation, enabling organizations to extract actionable insights and unlock the full potential of AI and advanced analytics—all from a single, secure solution.

Platform of Choice for Federal Agencies

DoD Certified for Classified Records Management and used by the National Archives and Records Administration (NARA) to establish the Capstone standard.

Trusted by the **Fortune 500** & Beyond

Enterprise-scale deployments at organizations across the Fortune 500 in Pharmaceuticals & Healthcare, Manufacturing, and Financial Services including 4 of the top 5 US Banks.
